# Money Making Concepts

7th
Fair Value Areas

OD (Overlapping Defense) (OLOD)

The first area we retrace back into where 2 PD Arrays are overlapping.
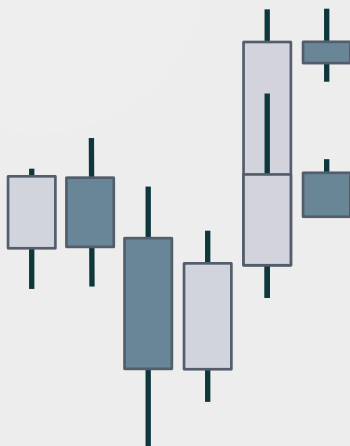

Best to worst:

- 1) Fair Value Area
- 2) Fair Value Gap

Where do FVAs get created?
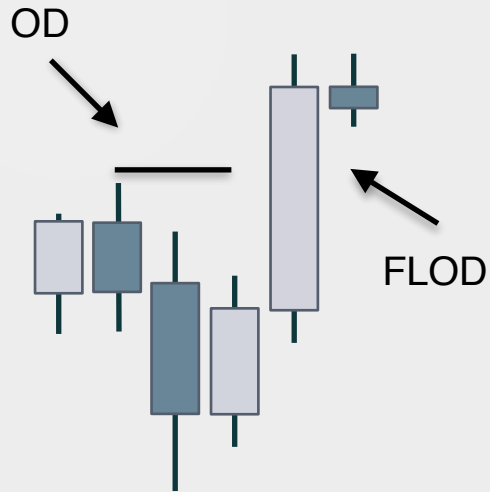

When taking out previous
Swing Points

Different FVAs

Based on strength again, we have different types of FVAs.

Best to worst:

- 1) FVA with overlapping FVG + Nested FVA
- 2) FVA with overlapping FVG
- 3) FVA when sweeping high / low

FLOD or OD?

Do we want to trade from the FVG or the FVA?

Depends on 2 things:

- What is Time telling us?

- Did we just take an ITH/ITL?
  If so, expect FVA.

Case Study

Start studying when FVAs get respected and when they get disrespected.
